# Index

L. AMERIO, T. ARGENTINI, L. BERNINI, D. ROCCHI, L. ROSA	
Wind loads on small scale façade louvers: comparison of fiber Bragg grating sensors and differential pressure measurements	8
T. ARGENTINI, G. DIANA, S. MUGGIASCA, D. ROCCHI	
Wind induced vibrations on a pedestrian arch bridge: wind tunnel tests on rigid and sectional models	10
A.M. AVOSSA, C. DEMARTINO, F. RICCIARDELLI, M. FERRAIOLI	
A probabilistic framework to the design of HAWTs subjected to combined wind and seismic actions: preliminary results	12
G. BARTOLI, C. MANNINI, M. DE MIRANDA	
Measurement and identification of damping for the Rio Higuamo Bridge	24
I. BAYATI, M. BELLOLI, L. BERNINI, A. ZASSO	
Wind tunnel testing of floating offshore wind turbine: scaling issues and imposed motion tests	26
M. BELLOLI, G. DIANA, S. GIAPPINO, L. ROSA, S. MUGGIASCA	
Wind-induced vibrations on non-circular section cables: application to a new Large Observation Wheel	28
N. BLAISE, T. ANDRIANNE, V. DENOËL	
Conditional expected static wind loads for structural responses driven by non-Gaussian local pressures	30
B. BLOCKEN, Y. TOPARLAR, T. ANDRIANNE	
Experimental and numerical analysis of cyclist drag reduction by trailing motorcycles	32
S. CAMMELLI, H.N. SINH	
Preliminary investigations on the aerodynamics of super-slender tall buildings	34
L. CARACOGLIA	
A novel reduced-order model to study the efficiency of a torsional-flutter-based wind harvester	42
F. CASTELLANI, D. ASTOLFI, M. BECCHETTI, N. BARTOLINI, L. SCAPPATICCI	
Wind Tunnel transient aerodynamic performance testing of a small wind turbine	52

I.F. LIMA CASTILLO, R. GÓMEZ MARTÍNEZ, A. POZOS-ESTRADA, J.A. ESCOBAR SÁNCHEZ	
Parametrical study of damage over glass façade using fragility curves	60
F. CLUNI, S. FIORUCCI, M. GIOFFRÈ, V. GUSELLA	
An approach based on substructures for the estimation of the response of tall buildings under wind loads using an equivalent beam	61
F. CLUNI, M.L. SEBASTIANI	
Response of tall building under wind loads: effect of turbulent component	63
D. CRISMAN, M. IZZI, S. NOÈ, L. CARACOGLIA	
Pressure coefficients for evaluating wind loads on large roofs: Comparison between Database-Assisted Design and Italian standards	64
C. DEMARTINO, A.M. AVOSSA, F. RICCIARDELLI	
Vulnerability of the urban and rural environment to extreme winds: the February 28 event in Italy	74
C. DEMARTINO, G. MATTEONI, C.T. GEORGAKIS	
GallAnalyzer: Open Source Toolkit for galloping stability assessment	84
N. DI FIORE, R. CHIODI, C. DEMARTINO	
Real wind actions versus design prescriptions: comparison between wind measurements and Italian code prescriptions in different structures of Italian Air Force	94
A. DI MATTEO, A. PIRROTTA, S. TUMMINELLI	
Combining TMD and TLCD: analytical and experimental studies	96
A. DOWNEY, F. UBERTINI, S. LAFLAMME, H. SAUDER, P. SARKAR	
Damage Detection of Wind Turbine Blade using Hybrid Dense Sensor Networks	97
E. AMAYA-GALLARDO, A. POZOS-ESTRADA, R. GÓMEZ-MARTÍNEZ	
Numerical and experimental simulation to obtain pressure coefficients over a small scaled cube: Mexican comparative study	99
G. HU, K.T. TSE, K.C.S. KWOK	
Enhancing performance of wind-energy harvester using fins on a square prism	100
A. GIACHETTI, C. MANNINI, G. BARTOLI	
Forces and pressure distributions on building façades with a screen: experimental and numerical two-dimensional studies	102
G.F. GIACCU, S. CORDA, T. PISANU, F. BUFFA, M. BRUN	
Wind effects on Sardinia Radio Telescope (preliminary results)	104
G.F. GIACCU, L. SCINTU, L. CARACOGLIA, B. BARBIELLINI	
RMS-based performance thresholds for the wind-induced response of tall buildings by Stochastic Approximation	106

M. GIOFFRÈ, M. GRIGORIU	
Simulation of strongly non-Gaussian wind pressures using mixed models	116
A. ŠARKIĆ GLUMAC, R. HÖFFER	
Computed flow separations and its effects on flutter derivatives – validated numerical study	118
L. IERIMONTI, L. CARACOGIA, I. VENANZI, A.L. MATERAZZI	
Wind loss estimation in tall buildings accounting for uncertainties in wind load and damage model characterization	128
S. IOUSEF, H. MONTAZERI, B. BLOCKEN, P. VAN WESEMAEL	
Applying non-conformal grids for LES simulations of convective heat transfer at the facades of a low-rise building	140
I. KALKMAN, B. BLOCKEN	
Pedestrian wind comfort optimization by adjoint CFD model analysis	142
J. LANKIN, J. MUNN, C. POZZUOLI	
Building the Case for Preliminary Analytical Desktop Analysis from a Wind Specialist – a Comparison with Wind Tunnel Testing for Stadio Della Roma	152
J. LIU, H. LIAO, M. LI, H. MEI	
Effect and Aerodynamic Mechanism of Stabilizer on Flutter Stability of Truss-girder Suspension Bridges	153
A. LO GIUDICE, L. BRUNO, D. FRANSOS	
Solid barriers for windblown sand mitigation: aerodynamic behaviour	165
M. LOPEMAN, G.E. FRANCO, S. PUCCIANO, K. VOJAK, M. MELSEN	
Evaluation of European Windstorm Models – An Application to Guy Carpenter’s Model Suitability Analysis (MSA)	175
F. LUPI, H.J. NIEMANN1, R. HÖFFER	
Non-linear Aerodynamic Damping in Vortex-Induced Vibrations	176
O. MANFRONI	
Lock-In due to Crowd and Wind Synchronizations: application to the new Footbridge in Terni	178
C. MANNINI, A.M. MARRA, L. PIGOLOTTI, G. BARTOLI	
The results of the experimental campaign on BARC benchmark	187
C. MANNINI, A.M. MARRA, T. MASSAI, G. BARTOLI	
The effects of turbulence on the interference of VIV and galloping for a rectangular cylinder	189
A.M. MARRA, C. MANNINI, G. BARTOLI	
Aerodynamic forces, wake flow and VIV response of a yawed bridge tower	191

T. MASSAI, CLAUDIO MANNINI, A.M. MARRA, G. BARTOLI	
Peculiar aspects of rectangular sections subjected to air and water flows	193
C. MEINHARDT, F. BOTTONI	
Experimental Assessment of the efficacy of Tuned Mass Damper Systems applied to Tall Buildings	195
V. MELATTI, F. VALVONA, V. GATTULLI	
Aerodynamic efficiency of a slender transmission tube tower	196
A. MOCKUTÈ, E. MARINO, A. GIUSTI, C. BORRI	
Effects of wind-wave misalignment in the case of nonlinear hydrodynamic loading of offshore wind turbines	207
H. MONTAZERI, Y. TOPARLAR, B. BLOCKEN, J.L.M. HENSEN	
Numerical modelling of evaporative cooling using water spray systems for heat stress reduction in urban areas	215
S. MUGGIASCA, I. BAYATI, M. BELLOLI, P. SCHITO, A. VANDONE, G. CAMPANARDI	
Aerodynamics of sailing yacht: full scale and wind tunnel tests	217
L.C. PAGNINI, M.P. REPETTO, A. FREDA, G. PICCARDO, M. ROSASCO	
Structural monitoring of a small size vertical axis wind turbine	219
O. PALUSCI, H. MONTAZERI, B. BLOCKEN, P. MONTI, C. CECERE	
Numerical modelling of urban microclimate in a compact urban area: a case study for Rome	221
L. PATRUNO, M. RICCI, B. BLOCKEN, S. DE MIRANDA	
Large Eddy Simulation for wind loads assessment on a low-rise building	223
L. PATRUNO, M. RICCI, S. DE MIRANDA	
Reduced structural models for the analysis of wind loading	225
F. PETRINI, A. GIARALIS	
Assessment of different tuned mass-damper-inerter (TMDI) topologies to suppress tall building oscillations in the across-wind direction	227
F. PETRINI, K. GKOUHAS, F. BONTEMPI, G. BISCARINI	
Piezoelectric EH from flow-induced vibrations	228
L. PIGOLOTTI, C. MANNINI, G. BARTOLI	
Experimental investigations on a flat plate equipped with porous screens undergoing classical flutter oscillations	238
E. PIGOUNI, M.G. CASTELLANO, R. BORELLA, S. INFANTI	
Fluid viscous dampers for the Isozaki/Allianz Tower in Milan, Italy	240

L. RAFFAELE, L. BRUNO, D. FRANSOS	
Windblown sand saltation: a probabilistic approach to sand transport	250
A. REZAEIHA, I. KALKMAN, B. BLOCKEN	
A numerical study of the effect of the central shaft on the performance of a VAWT	260
A. RICCI, I. KALKMAN, B. BLOCKEN, M. BURLANDO, A. FREDA, M.P. REPETTO	
Impact of model parameters on 3D-steady state RANS simulations of urban wind flow: the case study of Livorno city	262
F. RICCIARDELLI, A.M. AVOSSA, C. DEMARTINO	
Evaluation of gyroscopic effects on HAWTs	272
F. RIZZO, M. BARBATO, V. SEPE	
Peak factors dependence on wind angles of attack for a hyperbolic paraboloid roof	274
D. ROCCHI, G. TOMASINI, P. SCHITO, C. SOMASCHINI	
Wind effects induced by high speed train pass-by	280
D. ROMANIC, D. PARVU, H. HANGAN, G. SOLARI, M. BURLANDO	
New methodology for determining downburst touchdown location	282
G. TOMASINI, S. GIAPPINO	
Galloping-based piezo-aeroelastic energy harvester: numerical models and wind tunnel experimental tests	284
A. TORRIELLI, R.D. REDD	
Wind loads on the tower of wind turbines during installation	286
T. VAN DRUENEN, T. VAN HOOFF, H. MONTAZERI, B. BLOCKEN	
The application of a canopy or podium to a high-rise building for reducing pedestrian-level wind speeds	294
H. VANVINCKENROYE, V. DENOËL	
Stochastic stability of a rotational oscillator under gusty winds	304
R. VASATURO, I. KALKMAN, B. BLOCKEN, P.J.V. VAN WESEMAEL	
Impact of inflow methods and aerodynamic roughness lengths on the streamwise homogeneity of flow profiles in LES of the neutral ABL	306
I. VENANZI, M.L. FRAVOLINI, L. IERIMONTI	
Robust adaptive control of tall buildings based on multiple models	316
G. VITA, H. HEMIDA, C. BANIOPOULOS	
Turbulence modelling and turbulent inlet on a blunt plate: a numerical study	318
